

FC-600

Professional Inhalation Anesthesia Machine

Quality-Reliability-Innovation

- Compact, resistant and precise
- Two patient circuits installed directly on the machine (for use on very small animals, use on small animals, medium animals and large animals up to 120kg)
- Manual valve to exchange from one circuit to another, depending on the weight of the patient.
- Double flowmeter precise according to the weight of the animal
- Two high resistance masks, small and large.
- TEC 7 high precision vaporizer, human level!
- Includes accessories to use mechanical ventilation (The ventilator is optional)
- THREE YEARS WARRANTY ON THE MAIN STRUCTURE, INCLUDING THE VAPORIZER

Characteristic

- Compact light weight and portable.
- Specifically designed to accommodate low flow
- Selectatec compatible vaporizer mounting system.
- Two patient circuits installed directly on the machine.
- Manual valve to switch from one circuit to another, depending on the weight of the patient
- External and reusable welded lime canister, easy to see and replace.
- Very high efficiency TEC 7 type vaporizer.
- With pressure reducing valve to avoid API pressure hurt patient.
- Flow meter: O2 two tubes: 0.1~10L/M.
- Gas pressure: 0.25 ~ 65Mpa
- Professional design airtight breathing circuit.
- Two super durable high resistance masks.
- Installation and accessories for mechanical ventilation (The ventilator is optional)
